

# EDISON STATE COLLEGE

3/30/2010

Subject: Reference for William Azevedo

To whomsoever it may Concern,

I would like to take this opportunity to convey my pleasure in working with Bill Azevedo for 7 years from 2002 – 2008 on all Edison State College Campuses in South West Florida. He did many small budget “continuing contract” repair work as well as larger remodel/renovation projects. He has completed over a 100 projects worth more than \$15 million in 7 years.

At that time Mr. Azevedo worked as a CM under Edison’s continuing contract and was consistent in providing prompt, quality services for the college’s various construction projects. Many of these projects were under time and budget constraints and there was concern about maintaining a schedule that would allow the college to commence classes on time. The schedule that was provided made clear the critical path required to complete the project on time. All the projects were completed on time and within budget. Mr. Azevedo was also very helpful during hurricane Charlie when urgent instant repairs were required to get the campuses operational. He understands the needs of the owner and accomplishes the tasks assigned on time.

In closing, Mr. Azevedo strives to deliver the highest quality projects and takes pride in the work he does. I would highly recommend him for all of your construction needs.

Sincerely,

**Jyoti Naik, RA, CBO, LEED BD+C,  
Facilities Planner/Building Official**

To Whom It May Concern:

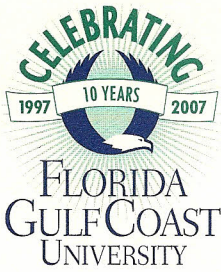

I have known Jeff Maddox of Maddox Construction for 8 years now. Most recently they were selected for our annual services construction management contract with Florida Gulf Coast University. In our initial year of the contract, they have done several projects such as Taco Bell, Subway, Einstein's and Starbucks build-outs along with planning and installing a modular music building, all of which were completed to our satisfaction. Most notably their ability to complete this work while the campus is occupied with faculty, staff and students has been vital. They were able to complete the above mentioned work without disruption of our everyday routines on campus.

It is a pleasure working with this firm, as they are most cooperative in all phases of construction from, planning, estimating and providing a high quality finished product. I look forward to long lasting relationship with Maddox Construction at Florida Gulf Coast University and I highly recommend them for any and all professional construction needs!

Sincerely,

Jim Hehl  
Director of Physical Plant

Mr. Jeff Maddox  
28016 Westbrook Drive  
Bonita Springs, FL 34135

Dear Jeff,

Greetings from Florida Gulf Coast University.

Just a brief note of thanks for all the good work you did at the Vester property this fall and winter. The dedication of the **Norm & Nancy Vester Marine and Environmental Science Field Station** was held in February and the property received wonderful reviews.

Please pass along our special thanks to all of your employees for dedicating their time and effort to this important project. We are all quite pleased.

Many thanks.

Sincerely,

A handwritten signature in blue ink, appearing to read "P. Lefferts".
